Dear Mrs Bastow

Planning consultation: Alterations and single storey extensions to Visitor Centre together with modifications to existing car parking areas, creation of additional car parking areas, proposed paths and erection of a dark skies viewing/bird hide building

Location: Sutton Bank Visitor Centre

Thank you for your consultation on the above dated 20 February 2018.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

WILDLIFE & COUNTRYSIDE ACT 1981 (AS AMENDED) CONSERVATION OF HABITATS & SPECIES REGULATIONS 2010 (AS AMENDED)

Landscape

The documents submitted with the application do not appear to include a Landscape and Visual Impact Assessment. We advise that such an assessment is carried out in accordance with the Guidelines for Landscape and Visual Impact Assessment in order to determine the impacts of the proposal on the special qualities and purposes of designation of the North York Moors National Park.

Protected species

We have not assessed this application and associated documents for impacts on protected species.

Natural England has published Standing Advice on protected species. The Standing Advice includes a habitat decision tree which provides advice to planners on deciding if there is a ‘reasonable likelihood’ of protected species being present. It also provides detailed advice on the protected species most often affected by development, including flow charts for individual species to enable an assessment to be made of a protected species survey and mitigation strategy.

You should apply our Standing Advice to this application as it is a material consideration in the determination of applications in the same way as any individual response received from Natural England following consultation.

The Standing Advice should not be treated as giving any indication or providing any assurance in respect of European Protected Species (EPS) that the proposed development is unlikely to affect the

---

EPS present on the site; nor should it be interpreted as meaning that Natural England has reached any views as to whether a licence is needed (which is the developer’s responsibility) or may be granted.

If you have any specific questions on aspects that are not covered by our Standing Advice for European Protected Species or have difficulty in applying it to this application please contact us with details at

Other advice
We would expect the Local Planning Authority (LPA) to assess and consider the other possible impacts resulting from this proposal on the following when determining this application:

- local sites (biodiversity and geodiversity)
- local landscape character
- local or national biodiversity priority habitats and species.

Natural England does not hold locally specific information relating to the above. These remain material considerations in the determination of this planning application and we recommend that you seek further information from the appropriate bodies (which may include the local records centre, your local wildlife trust, local geoconservation group or other recording society and a local landscape characterisation document) in order to ensure the LPA has sufficient information to fully understand the impact of the proposal before it determines the application. A more comprehensive list of local groups can be found at Wildlife and Countryside link.

Biodiversity enhancements
Natural England supports the proposed improvements in favour of turtle dove. This application may provide other opportunities to incorporate features into the design which are beneficial to wildlife, such as the incorporation of roosting opportunities for bats or the installation of bird nest boxes. The authority should consider securing measures to enhance the biodiversity of the site from the applicant, if it is minded to grant permission for this application. This is in accordance with Paragraph 118 of the NPPF. Additionally, we would draw your attention to Section 40 of the Natural Environment and Rural Communities Act (2006) which states that ‘Every public authority must, in exercising its functions, have regard, so far as is consistent with the proper exercise of those functions, to the purpose of conserving biodiversity’. Section 40(3) of the same Act also states that ‘conserving biodiversity includes, in relation to a living organism or type of habitat, restoring or enhancing a population or habitat’.

We would be happy to comment further should the need arise but if in the meantime you have any queries, please contact James Walsh on. For any new consultations or issues, please contact

Yours sincerely

James Walsh
