Dear Jill,

We have tried in indicated more numbers and arriving/leaving timescales. Also a map of parking. I hope this is enough. Thank you for your ongoing support and help as always!! You deserve a High Paradise scone!

Many thanks

Transport Statement re High Paradise

Our plan is to hold no more than 28 temporary events each year. Whether these are weddings, bike events or birthday parties.

We have indicated no more than 10 weddings a year. Our business is very seasonal running from March until the end of September - events mostly happen in this time frame. Events held out of season are few and far between, and are usually small birthday parties. We would like to hold a few dark sky events as well.

Weddings and birthday parties take place just on the day of the event. Customers generally arrive around midday and will have left High Paradise by 1am. Some customers for weddings will be staying onsite either in accommodation we have or camping. Customers for weddings will be arriving all at the same time, and leaving later on, ensuring there no problem with a crossover of traffic.

We encourage customers to use mini buses for transport- this is because we want to reduce the traffic and also to enable customers to traffic safely to and from High Paradise. We also are aware that the roads are narrow and windy and some people don't like to drive them so it will make it easier for them.

Bike events or similar are usually weekend events. Customers generally arrive on the Friday afternoon/Saturday morning, again it will therefore be mainly one way traffic. During events High Paradise provide food and drink onsite, so customers have no reason to leave until the event has finished, so again they all leave at the same time- making no problem for cross over traffic.

In terms of parking onsite, we have space for 12 cars on hardstanding around the farm, which is indicated on the map attached. For larger events such as sports events/wedding weekends we are able to use our private fields. As we are on limestone at High Paradise the land tends to stay very dry, and allows cars to park without any problem, this has worked extremely well to date.

We indicated in our last statement we would be able to hold 100 cars on our land. The land will actually take more cars than this, however 100 cars at one time is a very rare occurrence. This would only be for sport events, as for any other event as indicated most would arrive in full car loads/mini buses.

Parting
Individual Cars = 
parting in hold
