Subject: RE: 279547 (03) Rebuilding of overhead line (North York Moors NP)
NYM/2019/0154EN/OHL

Dear Lauren,

Thanks for your email. We can agree an extension until 7th May but we will need comments by that date.

In terms of the HBA information – the National Park Authority is not the determining Authority – that is the Secretary of State for the Department of Energy and Climate Change. We are only able to object or make observations and comments, so if your advice is that an HRA should be undertaken, we can pass those comments on.

Hope that helps.

Hilary

Subject: 279547 (03) Rebuilding of overhead line (North York Moors NP) NYM/2019/0154EN/OHL

Dear Hilary,

Thank you for consulting Natural England on planning application ref: NYM/2019/0154EN/OHL.

I note that the deadline for our comments is 01/05/19. We currently do not have capacity to respond to this until a new member of staff joins the team on 23/04/19. I was therefore wondering if it would be possible to be granted an extension of 1 week (until 07/05/19) in order to submit our comments?

I also note that there does not appear to be any ecological information or Habitats Regulations Assessment information on your website for this application. Given that this is within a SSSI and a SPA/ SAC such information is usually required. Has such information been submitted with this application?

Kind Regards,

Lauren

We are here to secure a healthy natural environment for people to enjoy, where wildlife is protected and England's traditional landscapes are safeguarded for future generations.

In an effort to reduce Natural England's carbon footprint, I will, wherever possible, avoid travelling to meetings and attend via audio, video or web conferencing.

Natural England offers two chargeable services – The Discretionary Advice Service ([DAS](#)) provides pre-application, pre-determination and post-consent advice on proposals to developers and consultants as well as pre-licensing species advice and pre-assent and consent advice. The Pre-submission Screening Service ([PSS](#)) provides advice for protected species mitigation licence applications.

These services help applicants take appropriate account of environmental considerations at an early stage of project development, reduce uncertainty, reduce the risk of delay and added cost at a later stage, whilst securing good results for the natural environment.
