Mrs J Bastow
North York Moors National Park Authority

Dear Mrs Bastow

Thank you for contacting me last week.
Further to our discussion I have more information for you.

The proposed building will be cut into the bank side similar to the existing building, we will be able to dig down approximately 1.5 metres, any further will put the building below ground level. When excavation work is taking place, we will dig out as deep as possible to keep the top line of the shed as low as possible.

Tree planting. I have included a basic plan. I intend to extend the existing orchard to 8 fruit trees these will be 1.75m when planted. There are 2 beech trees planted now these are 1.5m now. I intend to plant 15 assorted Hawthorn, Sycamore, Holly and Ash, these will have to be whips .3m high unless I can source any more mature trees at a reasonable price.

I intend to contact you regarding retrospective planning for the lean to building and discuss a planning application for a shed to cover the storage containers.

Yours faithfully

L E Hodgson
