Harriet

It's an improvement on what has been carried out (the already planted line of conifer) but it's vague - no plan and no numbers so what would you use to measure compliance with the condition?

How effectively this will screen or integrate the development I can't advise on from the information I have.

Mark

Dear Harriet,

I am happy to see that the original hedgerow is to be retained. Regarding the additional planting proposed, Omorika spruce would appear to be out of keeping with the surrounding area as native broadleaf species would be more appropriate, however I will defer to Mark's judgement on that.

Many thanks,

Elsbeth
