Subject: Grove Cottage - Revised Proposals.

Dear Harriet,

Further to your recent letter, please find attached our amended proposals for your consideration. We also respond as follows:-

Outbuilding Demolition

We note the comments on the removal of the outbuildings, enclosure, etc, therefore please find attached our amended proposals. We attach existing and proposed streetscene elevations that detail a proposed boundary wall arrangement that would provide some enclosure to the site by the construction of a new boundary wall, in reclaimed materials from the demolished outbuildings, that adopts the curved entrance design. The new wall is set back from the road line to suit the visibility splay required by highways, but would be masked by banking and retained/new planting for the full length. The existing boundary wall to the front of the house is retained, repaired and extended to enclose the front garden area.

Can we please reiterate that the outbuildings removed are not fit for purpose and in a dilapidated state so are no way suitable for refurbishment and retention. Ultimately they are being removed to create a safe ingress and egress from the site. If the existing access is retained, then the likelihood of a serious accident occurring is very high which we are trying to prevent.

Garage Design

We do not agree that the proposed garage is too domesticated or inappropriate for the scale of the property as the property already has these facilities therefore we were simply repeating what was already on the site. However to expedite matters, we have reduced the garage footprint and amended the roof design as requested. We still wish for the materials to be in stonework to match the main house, which will complement the extended building and area.

Front Window

Ground floor window size amended to match the first floor window.

Trust this is all acceptable. Look forward to hearing from you/Hilary in due course.

Kind regards
