To whom it may concern

I wish to object to planning application NYM/2019/0681/FL. for the following reasons:-

It has come to my attention that the Planning Department have taken it upon themselves without my consent or the express consent of my agent, to delete two pages of important and vital information from the Planning Application Statement, and have also intentionally omitted two attachments containing vital evidence included with the application submission that the planning committee need to arrive at an objective decision.

Given the above, in its present form, the application that has been published on the Authority's website is misleading as it is not as was submitted to the planning department for their consideration, and should not be determined without the planning committee and the public being provided with the opportunity to consider all the evidence that was submitted with the application that the planning department have chosen to suppress, the absence of which crucial evidence will result in the misrepresentation of the application as submitted to the Authority in such a way that will inevitably mislead the planning committee and the public alike and lead to an undemocratic decision being made.

Yours Sincerely  
Mr S D Ashworth  
Paddock House  
Cropton
