RE APPLICATIONS FOR  
3 BLOOMSWELL R.H. BAY  
APPLICATION NOS 2019/0704  
2019/0706.

I wish to raise objection to the application above on the following grounds.

Bloomswell was built as a piece with many features in common.

The door casing on 3 matches the others on the row, they are very good examples of vernacular architecture, I have never seen their like elsewhere. Any new door casings should match the original survivors, which is the rest of the terrace.

(2)

bar one. The shape of the top is wrong, it should be tripartite on the canopy. There is no blind fastight. I have in the past replaced two of these like for like, it is not rocket science.

The cash windows to the front are six pane not eight as is correct.

It is a shame planning advice wasn't sought to begin with.

Yours

NYMNF

---

As a listed property I would like to see the door colour changed to one of a more appropriate nature. The bright pink is not in keeping with the other listed properties in the street and spoils the whole row of houses. I am also concerned at what changes have been made internally to this property and whether the new windows and doors are made of the correct material.
