Dear Sir / Madam

Ref planning app No. NYM/2019/0867/FL

Living at the service station next door to the proposed development and knowing about the numbers of entrance / egress points in the area, I find it hard to comprehend that a further entrance on to the A171 might even be considered. Several accidents have occurred in this vicinity, two involving fatalities.

I myself have had planning refused because of access issues, as such I don't think a further access should be allowed. A total review of entrances in the area should be reviewed

The distance from the proposed garage to the applicants house is rather a distance, the size of the double garage lends itself to conversion to a bungalow. I am to believe that this is against Park authority rulings.

I myself have only just been informed of this application, having been away on holiday in India. The way I found out was by way of a notice posted on a fence post. Is it not common decency to inform immediate neighbours of planning applications ?

Bracken Rigg, the applicants home is currently accessed across my property, is it therefore their intention to close the current access.

These are questions I think the Park should be clarifying before granting any planning permission.

Regards
John Norton
