**Subject:** Re: Variation of condition 2 (material amendment) of planning approval NYM/2019/0328/FL to allow rooflight to north east elevation at Northfield Granary, Suffield

Hi Kirsty

The window will be a standard Velux conservation style roof light. It needs to be top hung to be classed as a suitable means of fire escape. The dimensions viewable are 78cm x 140cm. I have tried in vain to find the structural dimensions and I will call Velux today to try and get this information for you, however, none of the wholesalers seem to know. A link to the website with pictures of the design and more information is:

[Roofing outlet.co.uk/products/Velux-gpl-sd5j2-mk08-white-painted-top-hung-conservation-window-78-x-140-cm?](http://Roofingoutlet.co.uk/products/Velux-gpl-sd5j2-mk08-white-painted-top-hung-conservation-window-78-x-140-cm?)

Thus design is the same as the others on my home and my brothers barn conversion next door.

Please call if you need further information.

Regards

Christine
