NON-MAINS DRAINAGE FORM

3 copies to be submitted unless the application is submitted electronically

1. Please indicate distance to and location of the nearest mains drainage
1.5 miles (Muswarp)
(note: the Sewerage Undertaker can be contacted for this information)
2. Please indicate by ticking which method of foul drainage is proposed:
Package treatment plant to soakaway
Package treatment plant to watercourse []
Septic tank to soakaway []
Septic tank to watercourse []
Sealed Cess tank []
Other method such as reed bed. Please specify _____
3. Is this a new or existing system? NEW
4. If this is an existing system, what is the current capacity of the system and how many additional people will regularly be expected to use it? If this is a domestic property, what is the number of bedrooms now and how many bedrooms will be provided by the development proposed?
.....
5. If this is an existing system, do you have Consent to Discharge from the Environment Agency? YES/NO
6. If you intend to discharge to a watercourse, what is the name of the watercourse?
NO

Please indicate the discharge position on your site plan submitted with the planning application, clearly marked as such
(note: the watercourse must be capable of sufficient dilution (ten fold) to accept the flow. Without such dilution, there is the possibility of the build up of poor water quality during dry periods)
7. If the discharge is to a soakaway, indicate on your site plan its position and size.

What is the average percolation test results? 14
(note: guidance for carrying out tests is given on our website at www.moors.uk.net. You may be required to carry out a percolation test for an existing system if the size of development justifies an increase in the size of the soakaway.)
8. Are there any wells, springs or boreholes within 50 metres of the soakaway or point of discharge into the watercourse? YES/NO
Please give details: NO
.....

A letter from our plumber is to follow

Valley View
NYM/2020/0163/EUC

Herringbone dimensions
1.5 metres
3 metre span
length = 4 metres
4 x 3 metres
= 12 sq metres

I hope this is all in order

Kind regards

Lorraine

Dear Wendy,

Apologies we work with Pages not word so this can be a problem.

The results are below, many thanks,

Lorraine

Percolation test results

Hole 1

Test One - 13

Test Two - 14

Test Three - 16

Hole 2

Test One - 13

Test Two - 14

Test Three - 16

Hole 3

Test One - 12

Test Two - 13

Test Three - 14

Average value 13.8 (14)

$14 (V) \times 3 (P) (\text{people}) = 42$

$42 \times 0.25 = 10.5$

$A = 10.5$

$P = 3$

$V = 14$

Hello Lorraine

As discussed with these log cabins, each log cabin is being kept to the minimum of lighting and power supplies, all internal lighting are low wattage led warm white lighting kept at a minimum, the 1No outside light is very low wattage warm white led so to not take away the effectiveness of staying within a minimal technology wooden lodge and to use the older type coloured lighting being warm white.

Any issues at all anyone is welcome to give me a call on my number below or Mobile 07814584291.

Many Thanks

Ethan Hume
