

### Shed Planning Application – design statement

An application is submitted to support the replacement of an existing dilapidated shed with a new one in a similar style – same width, but longer.

The shed is being provided by Leisure Timber Products Ltd and is fairly generic in design, and will sit on the existing base.

Both old and new sheds are 2m in height to the apex and as such sit lower than the external boundary wall – the house sits at a lower level to the external pathway and road and as such the shed is not actually visible externally.

Dimensions -

Existing shed	W 1.52m	L 2.05m	H 2m
New shed	W 1.52m	L 3.96m	H 2m
