No objections to the replacement window with a style which matches the historic windows elsewhere in the building. However the window should be single glazed to match the rest of the elevation which is in line with the advice provided by Historic England in their Guidance - "Traditional Windows, Their Care, Repair and Upgrading". This Guidance represents the most up to date guidance endorsed by the Government on the subject of window replacement in buildings with heritage interest and states that "where the aesthetic value of the building is high, then the impact on the whole of the relevant elevation should be considered, including the desirability of accurately matching other windows." As such, a single glazed window constructed in the traditional manner should be provided. Please condition sectional details to be agreed.

No objections to the sauna building which is located in the rear yard. Because of the topography of the surrounding land, this structure is unlikely to be visible from any public view and given its subservient scale and freestanding nature is unlikely to impact on the special interest of the host building or the character and appearance of the wider Robin Hood's Bay Conservation Area.
