Good afternoon

Condition 4 of this decision:

"No joints shall be raked out until a sample area which shall be at least 1m x 1m in size has been prepared on site for inspection and approved in writing by the Local Planning Authority. Joints in stonework should be carefully raked out utilising hand tools narrower than the width of the joint to a minimum depth of 1 1/2 times the width of the joint or until sound mortar is reached. Power tools such as *a drills* should not be used. The work shall continue in accordance with the approved sample. "

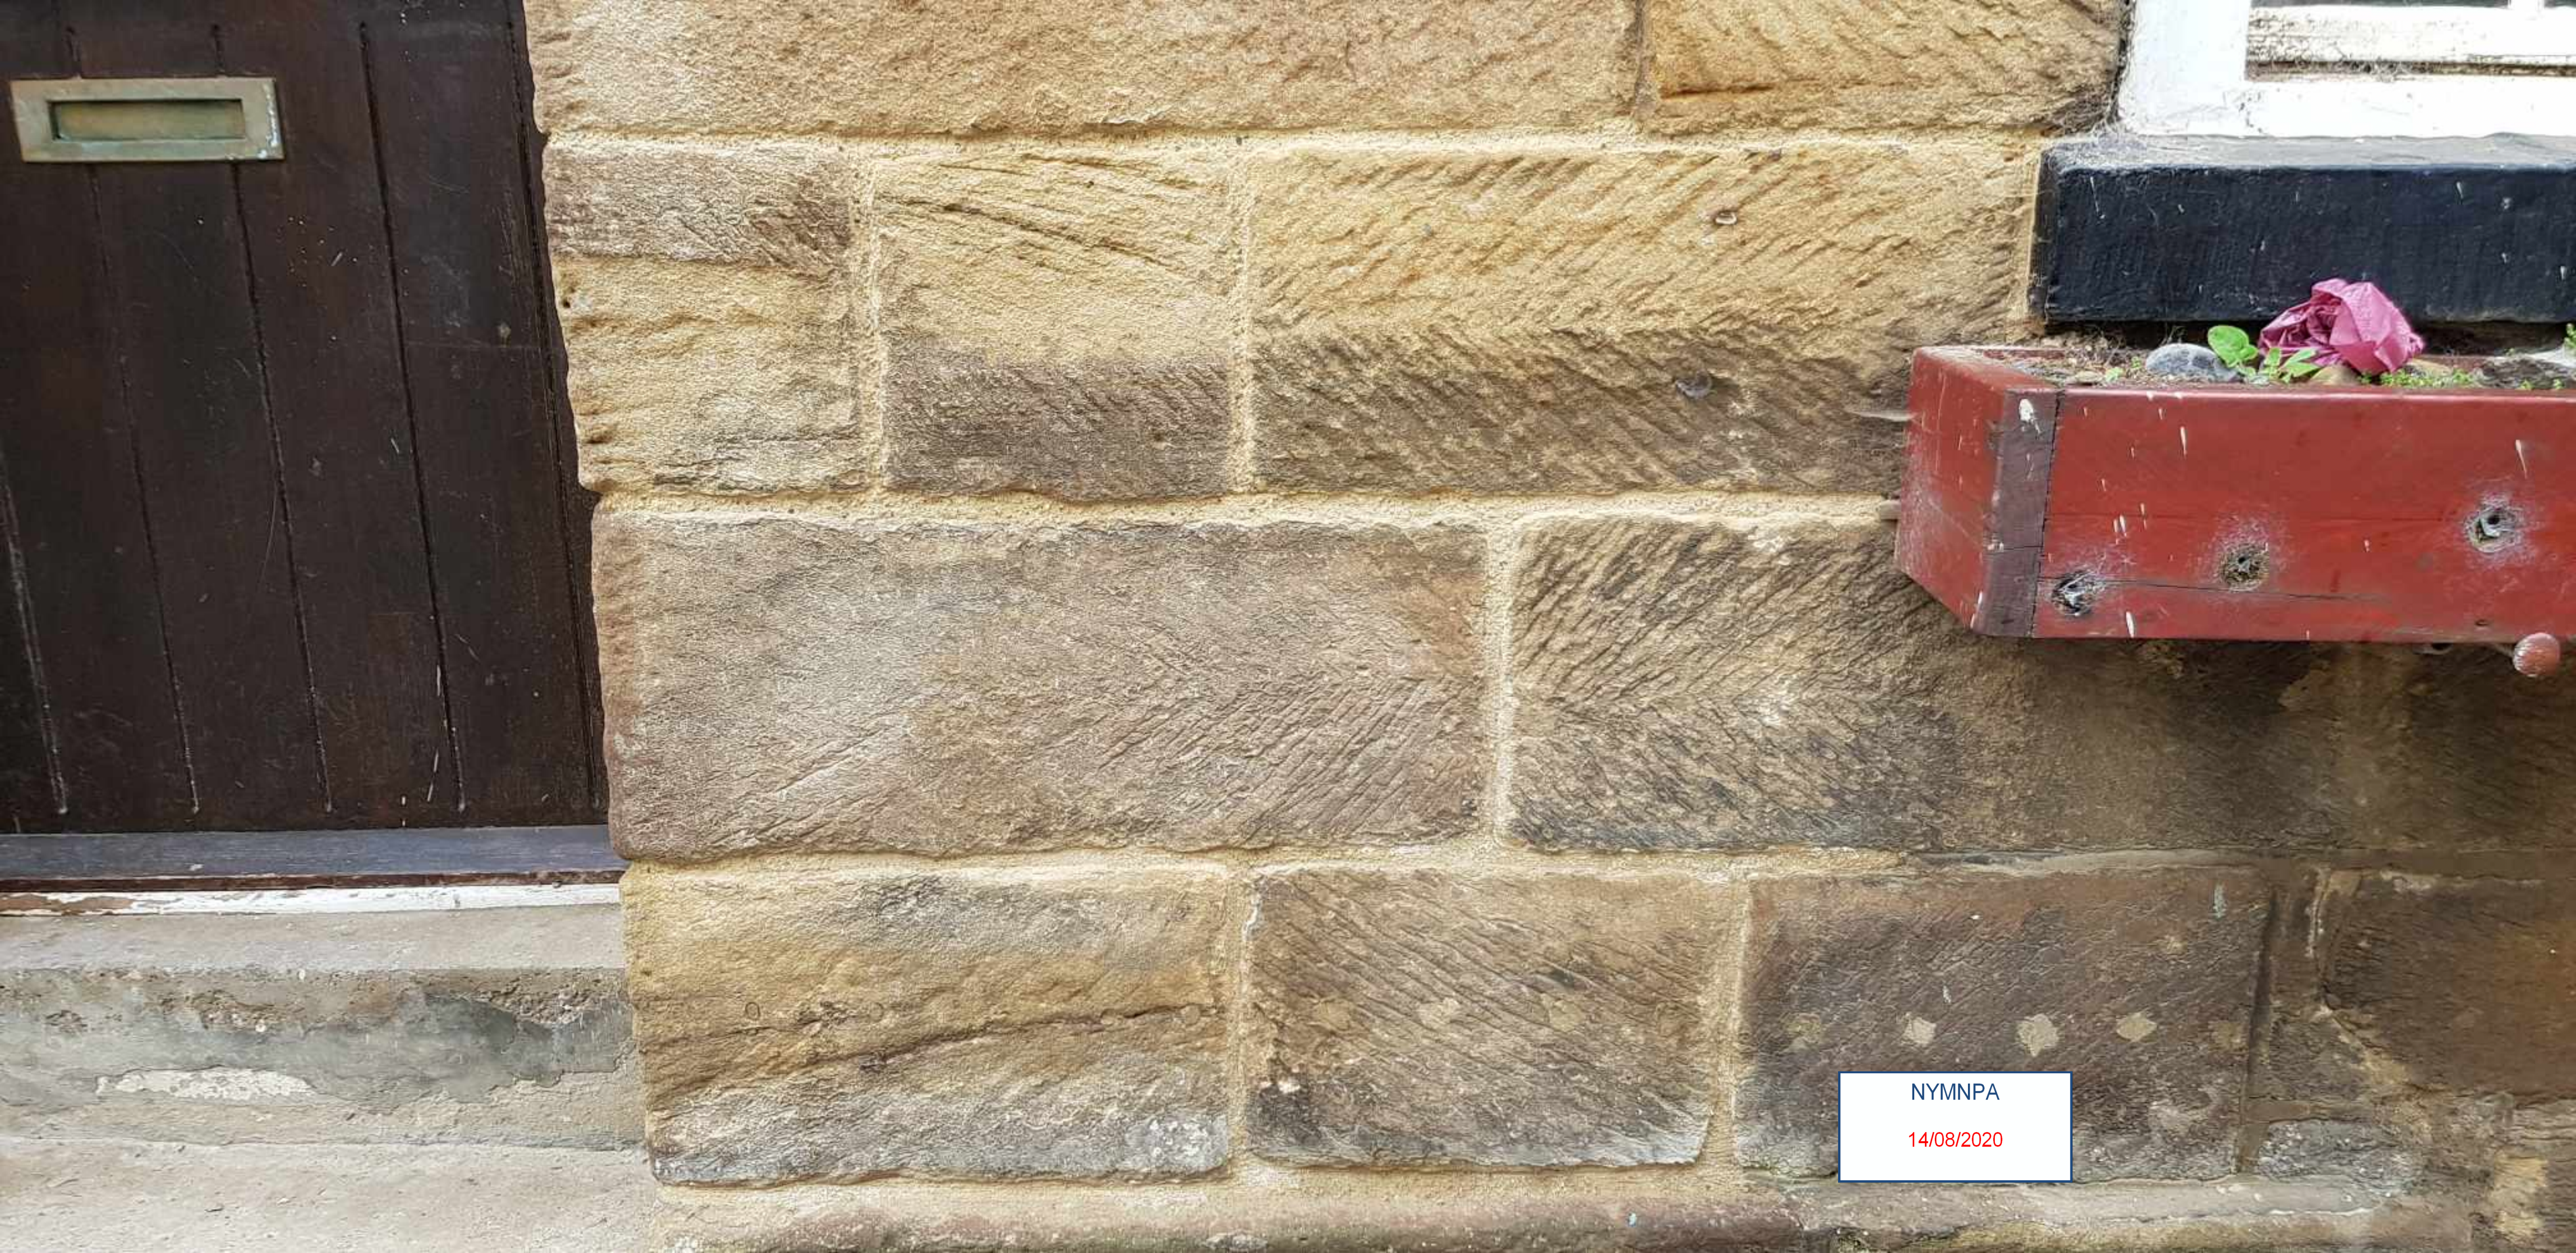

Just to confirm a sample area has been prepared and is available for inspection by the Local Planning Authority.

Thanks very much

Joe Kingham
