The National Park has special qualities that include tranquillity and dark skies and as a result has been designated as an International Dark Sky Reserve. Protecting tranquillity is also included in our local plan. Artificial light at night should be only used for purposes that include health and safety, security and wellbeing. Even then, light should be used in a way that is sympathetic to the night time environment including fully shielded (zero upward light) well controlled fixtures (timers/sensors) at an appropriate colour temperature ( $\leq 3000\text{k}$ ). The permanent lighting of recreational facilities such as crazy golf for use at night in the National Park doesn't fit with those purposes and on that basis I would object to this request for lighting.

Best regards  
Mike
