Dear Helen,

Following on from my previous email regarding render colour for 7 Laburnum Avenue, Robin Hoods Bay, YO22 4RR, remarkably render samples arrived in the post yesterday!! (This is well over a month since they were requested and several builders contacted) We would like to submit our chosen render for the new extension to the rear of the house to be Weber Saint- Gobain render, colour, Silver Pearl. This render is one of the weberpral M through-coloured moncouche renders. We think this is the best colour match for the lighter tones of the existing stonework. There website is www.uk.weber to see samples, or we could post you the sample if you so wish. We have been advised that for durability, a smooth textured finish is the best. Do you require further details on the finish?

Many thanks for your help and we look forward to hearing from you.

Louise Shackleton
