Application by I Park Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park,
Whitegates Close, Staithes

- 1.0 General Introduction
 - 1.1 This document is attached to and forms part of a formal application.

- 2.0 Brief Description of the proposed development.
 - 2.1 The applicants operate the westernmost of two adjoining car parks in the village of Staithes.
 - 2.2 They have erected two metal columns to support Automatic Number Plate Recognition and Closed Circuit Television Cameras.
 - 2.3 These need planning permission and do not have it.
 - 2.4 This application seeks permission to retain one post and to, in effect, relocate the other.

- 3.0 Summary of Revisions (if applicable)
 - 3.1

- 4.0 Conditions
 - 4.1 **If it becomes necessary to discuss conditions, they will be discussed here.**

Planning Statement
Yes

1.0 Introduction

1.1 The Planning Statement discusses the application under the following headings;

- 2.0 Descriptive
- 3.0 Development Plan
- 4.0 National Planning Policies
- 5.0 Discussion
- 6.0 Conclusion

2.0 Descriptive

- 2.1 The application site is in a car park.
- 2.2 GoogleEarth shows that in 2001 the car park did not exist.

By 2005 there was one large car park. This ties in with a planning permission granted in 2003;

40510570 Bank Top Car Park, Whitegate Close, Staithes

Christopher C Kendall Dip TP MRTPI

Chartered Town Planner

Application by IPark Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park, Whitegates Close, Staithes

Re-design and extension of existing car park, together with demolition of existing public toilets and erection of a resource centre to include public toilets, business units and community rooms – approved 2003 but no plans available on-line

In 2009 the layout was the same.

Christopher C Kendall Dip TP MRTPI

Chartered Town Planner

Application by I Park Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park, Whitegates Close, Staithes

However, in 2010/2011 part of the car park was sold to the current owner and two car parks were in operation. The 2018 photograph shows;

The 2019 photograph shows both car parks very busy.

Application by I Park Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park, Whitegates Close, Staithes

- 2.3 All car park operators have expenses – rent (in many cases), business rates, maintenance, staff (even if not present on site). Most people will pay to park, or observe time limits for free parking. However, people who do not pay for the time they have parked are, in effect, a cost to the operator. All operators have systems of monitoring car parks to ensure that visitors pay. There are different methods such as payment on exit, staff patrolling car parks and monitoring pre-paid tickets, or as is now the case with an increasing number of car parks, automatic number plate recognition cameras which can correlate the time of entry with the time of departure and the fee paid.
- 2.4 ANPR cameras need to be in an elevated position for two reasons; they need to be high enough to avoid being vandalised; ideally they should be visible so that users of the car park have the opportunity to see them, and in conjunction with the signs, know that users will be monitored. The camera cannot be too high otherwise it will not read the number plate correctly.
- 2.5 The applicants have installed two metal posts which each support a CCTV camera and an ANPR camera. They are currently approximately 5m high, but this application effectively seeks to reduce them to 3m.
- 2.6 One post is to be removed from the current location and relocated into the body of the car park.
- 2.6 The ANPR ensures that users of the car park pay the appropriate charge. The CCTV camera monitors the car park generally.

3.0 Development Plan

3.1 The Development Plan is the North York Moors National Park Authority Local Plan July 2020.

3.2 Strategic Policy C - Quality and Design of Development

To maintain and enhance the distinctive character of the National Park, development will be supported where:

1. The proposal is of a high quality design that will make a positive

Christopher C Kendall Dip TP MRTPI

Chartered Town Planner

Application by IPark Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park, Whitegates Close, Staithes

contribution to the local environment in accordance with the principles set out in the North York Moors National Park Authority Design Guide;

2. The proposal incorporates good quality construction materials and design details that reflect and complement the architectural character and form of the original building and/or that of the local vernacular;
3. The siting, orientation, layout and density of the proposal complement existing buildings and the form of the settlement, preserving or enhancing views into and out of the site and creating spaces around and between buildings which contribute to the character and quality of the locality;
4. The scale, height, massing and form of the proposal are compatible with surrounding buildings and will not have an adverse impact upon the amenities of adjoining occupiers;
5. Sustainable design and construction techniques are incorporated in the proposal including measures to minimise waste and energy use and where appropriate use energy from renewable sources;
6. A good quality landscaping and planting scheme which reinforces local landscape character, increases habitat connectivity and makes use of appropriate native species forms an integral part of the proposal;
7. Proposals enhance local wildlife and biodiversity, for example through the inclusion of nesting boxes and bat roosts;
8. Provision is made for adequate storage including storage for domestic items kept outdoors and waste management facilities;
9. Where appropriate, cycling facilities and car parking are provided provision and without compromising local highway safety, traffic flow or Public Rights of Way; and
10. The proposal ensures the creation of an accessible, safe and secure

Christopher C Kendall Dip TP MRTPI

Chartered Town Planner

Application by I Park Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park,
Whitegates Close, Staithes

environment for all potential users, including the elderly, children and those with a health condition or impairment.

Policy CO3 - Car Parks

New parking facilities will only be permitted where:

1. It is the only way to solve existing identified parking problems;
2. It will benefit the needs of both communities and visitors to the National Park;
3. It uses an existing or previously developed site unless it can be demonstrated that no such suitable sites are available; and
4. The scale, design, siting, layout, and surfacing do not have an unacceptable impact on the natural beauty, wildlife or cultural heritage of the National Park.

4.0 National Planning Policies

4.1 NPPF encourages good quality design.

4.2 NPPF also acknowledges that crime and the fear of crime are material planning considerations.

5.0 Discussion

5.1 The Planning Act requires that in determining planning applications regard is to be had to the development plan and all material considerations. By implication, regard cannot be had to immaterial considerations. The Act does not specify what considerations are material or immaterial. Over many years the Courts have decided this on a case by case basis.

5.2 It is considered that in this case there is one material consideration – the effect of the development on the appearance of the area, often referred to as visual amenity.

Christopher C Kendall Dip TP MRTPI

Chartered Town Planner

Application by I Park Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park,
Whitegates Close, Staithes

- 5.3 The rights and wrongs of charging for parking are not a material consideration, neither is the enforcement of parking restrictions.
- 5.4 The posts – and it should be remembered that this application relates to 3m high posts, considerably lower than the existing ones – comes within what is normally regarded as street furniture, those everyday objects, which are visible but to many people, invisible, which guide, control, protect everyday lives, along with other items such as electricity and telephone poles. There are many items of street furniture in the village of Staithes, including in the Conservation Area.
- 5.5 In terms of design, street furniture is simple and is designed to do a job.
- 5.6 In this case the posts support two cameras which are necessary to facilitate the operation of the car park. The ANPR cameras are necessary to ensure that users of the car park pay for so doing, and the CCTV cameras are necessary for crime prevention and general safety.
- 5.7 It is noted that in the adjacent car park, operated by Scarborough Borough Council there are lighting columns. The columns support lighting units which exist to illuminate the car park in darkness, in the interests of safety and security. These lighting columns are higher and more prominent than the columns proposed by the applicants.
- 5.8 One of the posts is already in position. The other is in what has been an adjoining overflow car park. There does not appear to be any planning permission for this additional car park. The land has been sold and is no longer being used by the applicants. The post will be removed and relocated in the existing, lawful, car park.
- 5.9 The application is, therefore, retrospective in respect of one post and prospective in respect of the other.
- 5.10 Although the Act requires that applications are determined in accord with the development plan, the Local Plan has very little to say about the development.

Application by IPark Smart Ltd For the erection of two 3m high ANPR camera and CCTV mounting posts At Car Park,
Whitegates Close, Staithes

Strategic Policy C is a general design policy. Although Policy CO3 has been quoted above it is not relevant as it refers to new, not existing, car parks.

6.0 Conclusion

6.1 It is assumed that the Council became aware of the development as a result of a complaint, and that this complaint was motivated by concern about how the car park operates, and not by a concern about a material planning consideration.

6.2 The applicants consider that the camera columns, particularly when reduced to 3m (as applied for) would not have any harmful effect on the appearance of the area. They do, however, have benefits in terms of crime prevention and safety.

The yellow pin shows the present location of the column which is to be relocated. The rectangle of rough grass between it and the red car /white camper van was the overspill car park, which is no longer used and is not part of this application.
