Dear Sirs

My wife and I recently purchased Deepdale Farm and while we have not been involved with the preceding planning applications and refusals, we would like to register our objections to this application. Having read through a copy of the North York Moors National Parks Authority Local Plan July 2020, we feel that the proposed application clearly contravenes several core policies, as laid out in the said document.

On a personal level, it is our understanding that Deepdale Farm sits on the prevailing flight path that the applicant's aeroplane will predominantly use. Whether on take off or landing we will be subjected to noise either when the aeroplane passes overhead or by the noise carried on the wind.

We live in a quiet undisturbed part of the forest and this application, if approved, will cause untold disturbance to all residents, be they human, animal, or avian.

Yours faithfully

Kevin Ingram
