

## DESIGN AND ACCESS STATEMENT

### MOORFOOT HOUSE FARM, GLAISDALE YO21 2PU

The above holding extends to approx. 980 acres and operates as a sheep unit carrying approximately 500 head and comprises both moor and breeding sheep.

Increased sheep numbers have resulted in a lack of capacity within the existing buildings and as such, a new building is proposed to accommodate the breeding sheep over winter and to prepare them for sales.

The design of the building is similar to many existing livestock buildings within the vicinity and in keeping with the natural environment.
