---

Dear Miss Megan Omara. We the closest neighbours to the said building thought as we have been told that permission had already been granted as the wooden roof trusses and scaffolding are already in place. If you came on a visit you would realise the devastation it has caused us for the past year. The building in question is completely separate from Bank House and was used as a commercial outlet before. When you stand even a mile away it changes the view of the village as it towers above the surrounding buildings. Your sincerely Temperance House Grosmont.
