Importance: High

Dear Sir or Madam,

Thank you for seeking the Forestry Commission's advice about the impacts that this application may have on Ancient Woodland. As a non-statutory consultee, the Forestry Commission is pleased to provide you with the attached information that may be helpful when you consider the application:

- Details of Government Policy relating to ancient woodland
- Information on the importance and designation of ancient woodland

Ancient woodlands are irreplaceable. They have great value because they have a long history of woodland cover, with many features remaining undisturbed. This applies equally to Ancient Semi Natural Woodland (ASNW) and Plantations on Ancient Woodland Sites (PAWS).

It is Government policy to refuse development that will result in the loss or deterioration of irreplaceable habitats including ancient woodland, unless "*there are wholly exceptional reasons and a suitable compensation strategy exists*" (National Planning Policy Framework paragraph 175).

We also particularly refer you to further technical information set out in Natural England and Forestry Commission's [Standing Advice on Ancient Woodland](#) – plus supporting [Assessment Guide and Case Decisions](#).

As a Non Ministerial Government Department, we provide no opinion supporting or objecting to an application. Rather we are including information on the potential impact that the proposed development would have on the ancient woodland.

These comments are based upon information available to us through a desk study of the case, including the [Ancient Woodland Inventory](#) (maintained by Natural England), which can be viewed on the [MAGIC Map Browser](#), and our general local knowledge of the area.

We hope these comments are helpful to you. If you have any further queries please do not hesitate to contact me.

Yours faithfully,

Serena Clifford

Protecting and expanding England's forests and woodlands, and increasing their value to society and the environment

A summary of Government policy on ancient woodland

[Natural Environment and Rural Communities Act 2006](#) (published October 2006).

Section 40 – “Every public authority must, in exercising its functions, have regard, so far as is consistent with the proper exercise of those functions, to the purpose of conserving biodiversity”.

[National Planning Policy Framework](#) (published July 2018).

Paragraph 175 – “*development resulting in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees) should be refused, unless there are wholly exceptional reasons and a suitable compensation strategy exists*”.

[National Planning Practice Guidance](#) – Natural Environment Guidance. (published March 2014)

This Guidance supports the implementation and interpretation of the National Planning Policy Framework. This section outlines the Forestry Commission’s role as a non statutory consultee on “*development proposals that contain or are likely to affect Ancient Semi-Natural woodlands or Plantations on Ancient Woodlands Sites (PAWS) (as defined and recorded in [Natural England’s Ancient Woodland Inventory](#)), including proposals where any part of the development site is within 500 metres of an ancient semi-natural woodland or ancient replanted woodland, and where the development would involve erecting new buildings, or extending the footprint of existing buildings*”

It also notes that ancient woodland is an irreplaceable habitat, and that, in planning decisions, **Plantations on Ancient Woodland Sites (PAWS) should be treated equally in terms of the protection afforded to ancient woodland in the National Planning Policy Framework.** It highlights the Ancient Woodland Inventory as a way to find out if a woodland is ancient.

[The UK Forestry Standard](#) (4th edition published August 2017).

Page 23: “Areas of woodland are material considerations in the planning process and may be protected in local authority Area Plans. These plans pay particular attention to woods listed on the Ancient Woodland Inventory and areas identified as Sites of Local Nature Conservation Importance SLNCIs”.

[Keepers of Time](#) – A Statement of Policy for England’s Ancient and Native Woodland (published June 2005).

Page 10 “The existing area of ancient woodland should be maintained and there should be a net increase in the area of native woodland”.

[Natural Environment White Paper “The Natural Choice”](#) (published June 2011)

Paragraph 2.53 - This has a “renewed commitment to conserving and restoring ancient woodlands”.

Paragraph 2.56 – “The Government is committed to providing appropriate protection to ancient woodlands and to more restoration of plantations on ancient woodland sites”.

[Standing Advice for Ancient Woodland and Veteran Trees](#) (first published October 2014, revised November 2018)

This advice, issued jointly by Natural England and the Forestry Commission, is a material consideration for planning decisions across England. It explains the definition of ancient woodland, its importance, ways to identify it and the policies that are relevant to it.

The Standing Advice refers to an [Assessment Guide](#). This guide sets out a series of questions to help planners assess the impact of the proposed development on the ancient woodland.

[Biodiversity 2020: a strategy for England’s wildlife and ecosystem services](#) (published August 2011).

Paragraph 2.16 - Further commitments to protect ancient woodland and to continue restoration of Plantations on Ancient Woodland Sites (PAWS).

Importance and Designation of Ancient and Native Woodland

Ancient Semi Natural Woodland (ASNW)

Woodland composed of mainly native trees and shrubs derived from natural seedfall or coppice rather than from planting, and known to be continuously present on the site since at least AD 1600. Ancient Woodland sites are shown on Natural England’s Inventory of Ancient Woodland.

Plantations on Ancient Woodland Site (PAWS)

Woodlands derived from past planting, but on sites known to be continuously wooded in one form or another since at least AD 1600. They can be replanted with conifer and broadleaved trees and can retain ancient woodland features, such as undisturbed soil, ground flora and fungi. Very old PAWS composed of native species can have characteristics of ASNW. Ancient Woodland sites (including PAWS) are on Natural England’s Inventory of Ancient Woodland.

Other Semi-Natural Woodland (OSNW)

Woodland which has arisen since AD 1600, is derived from natural seedfall or planting and consists of at least 80% locally native trees and shrubs (i.e., species historically found in England that would arise naturally on the site). Sometimes known as ‘recent semi-natural woodland’.

Other woodlands may have developed considerable ecological value, especially if they have been established on cultivated land or been present for many decades.

Information Tools – The Ancient Woodland Inventory

This is described as provisional because new information may become available that shows that woods not on the inventory are likely to be ancient or, occasionally, vice versa. In addition ancient woods less than two hectares or open woodland such as ancient wood-pasture sites were generally not included on the inventories. For more technical detail see [Natural England's Ancient Woodland Inventory](#). Inspection may determine that other areas qualify.

As an example of further information becoming available, Wealden District Council, in partnership with the Forestry Commission, Countryside Agency, the Woodland Trust and the High Weald AONB revised the inventory in their district, including areas under 2ha. Some other local authorities have taken this approach.

Further Guidance

[Felling Licences](#) - Under the Forestry Act (1967) a Felling Licence is required for felling more than 5 cubic metres per calendar quarter. Failure to obtain a licence may lead to prosecution and the issue of a restocking notice.

[Environmental Impact Assessment](#) - Under the Environmental Impact Assessment (Forestry) (England and Wales) Regulations 1999, as amended, deforestation which is likely to have a significant impact on the environment may also require formal consent from the Forestry Commission.

Please note the following responses from Glaisdale Parish Council, to applications listed below :

NYM/2021/0256/CU – Application for change of use of part of dwelling to bakery (production and retail) at 3 Railway Cottages, Glaisdale.

- **No Objections raised.**

NYM/2021/0325/FL – Application for erection of agricultural livestock building at Moorfoot House, Glaisdale.

- **No Objections raised.**

Dear Megan

I have no objection to the proposed development.

For the purposes of the Habitat Regulations I assert that;

- The application is not necessary for the management of any European designated site;
- But that the works will not have a Likely Significant Effect on any European designated site.

The application can therefore be screened out of any further Habitat Regulations Assessment.

Many thanks

Elsbeth

BY EMAIL ONLY

Dear Megan O'Mara,

**Planning consultation: Application for erection of agricultural livestock building
Location: at Moorfoot House, Glaisdale**

Thank you for your consultation on the above dated 04 May 2021 which was received by Natural England on 04 May 2021.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

NOT ABLE TO PROVIDE DETAILED ADVICE

Natural England is not able to fully assess the potential impacts of this proposal on statutory nature conservation sites or protected landscapes or, provide detailed advice on the application. If you consider there are significant risks to statutory nature conservation sites or protected landscapes, please set out the specific areas on which you require advice.

The lack of detailed advice from Natural England does not imply that there are no impacts on the natural environment. It is for the local planning authority to determine whether or not the proposal is consistent with national and local environmental policies. Other bodies and individuals may provide information and advice on the environmental value of this site and the impacts of the proposal on the natural environment to assist the decision making process.

Generic advice is provided in the Annex attached.

Please send further correspondence, marked for my attention, to
quoting our reference 352137.

Yours faithfully

Amy Knafler

Annex - Generic advice on natural environment impacts and opportunities

Air quality impacts on SSSIs

The interest features of affected designated sites may be sensitive to impacts from aerial pollutants, To determine any likely air quality impacts arising from this proposal, an initial screening for air quality impacts should be completed. Simple screening tools are available via the internet, such as the Simple Calculation of Atmospheric Impact Limits (SCAIL) model: <http://www.scail.ceh.ac.uk/>. The results of this screening should inform the need for any further , more detailed assessment which may be required to fully assess the impacts of the proposal.
