FAO: Hilary Saunders **Copies to:**

The Highway Authority has received sufficient information to discharge the condition relating to **NYM21/0402/CVC** however further assessment of these proposals may be required to ensure compliance with highway legislation

The Local Highway Authority has considered the following conditions:-

- | Number | Discharged/Not Discharged |
|-----------|---|
| 4. and 9. | The accesses into the fields on either side of the highway have been constructed and approved by the Local Highway Authority |
| 5. | A dry stone wall along the line of the existing field boundary would be acceptable to the LHA |
| 10. | Requires that detailed construction drawings are submitted for approval by the LHA along with the necessary details to allow a Technical Approval of the structure, and for those details to be submitted for a Stage 2 Safety Audit. The LHA has NOT received any of the necessary information. |
| 11. | None of the information required for condition 10 has been submitted and therefore no construction of any element of the structure may be undertaken within, on or under the highway |
| 12. | Although construction has not begun of the underpass, cattle are still moved between fields on either side of the road resulting in varying amounts of detritus and manure being deposited on the highway. This should be removed after each livestock movement. |

**LOCAL HIGHWAY AUTHORITY
CONSIDERATIONS and RECOMMENDATION**

Continuation sheet:

Application No:

NYM21/0402/CVC

13. and 14. No details submitted.

The applicant has stated that conditions 10 to 15 will be dealt with by appointed construction and engineering companies, the processes involved require the submission of detailed information for checking and verification, processes which can be complex and time consuming, early involvement with the LHA is recommended to allow completion of these processes.

Construction within, on or under the highway must no begin until all approval processes have been satisfactorily completed.
