I fully support the application Mr Noble has outgrown his premises at Ruswarp, this was sited in a very unsuitable area at Ruswarp, moving up to the industrial estate will allow better access for bulk vehicles. Nobles are the only Skip Hire company in Whitby the other Waste Operator in Whitby decimated their skip hire business (council owned), if Nobles are not allowed to expand in line with the proposed building developments for Whitby and surrounding areas Waste Operators will have to come into the area from at least 20 miles therefore increasing carbon footprint.

Subject: Website Query

Good afternoon. I am wondering if you could pass this email onto the planning department.

My name is Mike Shardlow from Beacon farm, sneaton, whitby.

I am emailing regards John noble recycling. As a parish Councillor and resident of sneaton parish, I think it would be a good idea for the wast business at Ruswarp which is part of our parish, to relocate to the industrial estate at whitby. The business has been a great success but has outgrown the site. It would reduce the traffic in the Ruswarp area.

Kind regards Mike Shardlow.

I would be grateful to be given the opportunity to be able to comment on my support for this application. I see the benefits of the resiting of Noble Recycling and Skip hire, from two different points of view. From a business point of view the current location of the operation is not ideal as it is somewhat constrained by both geographical and logistical issues. During the initial phase the operation seemed well placed, as it formed part of a site from which an existing transport and warehousing business was already operating from. However, as the demand for the services which the business provides increased exponentially, then the need to expand in line with this became more and more of a requirement. In order to be able to fulfil the needs of the ever increasing customer base, and to be able to offer the current headcount of colleagues and any potential increases in employment opportunities, a more secure and sustainable future, then the time had come to look for a further, more substantial operating centre to enable the processing and recycling of more waste. The proposed relocation and the building of new the site on the industrial estate would be beneficial, not only for the expansion of the business and its added contribution environmentally, but also would provide much needed further employment to Whitby and reduce proportionally, its reliability on seasonal tourism and hospitality.

From a logistics point of view the new site would have a profound effect on the village of Ruswarp itself a village of which I am a resident. Any reduction in vehicle movements through the village would be welcomed wholeheartedly by all of the residents. The perception of HGVs and their accompanying noise, particularly in village with small narrow roads, is always one of disdain. To most they are seen as a noisy, health and safety necessary evil, and not the mainstay of the life and blood of the country without which our lives would become almost indiscernible. Notwithstanding the fact that Ruswarp High Street is notoriously busy throughout the working day and is probably one of the busiest B roads in the country, and reduction in traffic would indeed be a bonus.

As I do a limited amount of administrative and compliance work for Noble Recycling and Skip Hire it could be perceived that there may be a certain amount of Conflict of Interest on my part. However, I can assure any readers of these comments that they are intended to be beneficial to all parties included and as such could be made by any layman.

Dear Sir's

I write in support of the application.

I have used the services of the applicant for several years. The applicant provides a professional well managed services, which is a credit the the local area.

This application will allow the applicant to build a modern and efficient facility. The new facility will allow greater recycling.

The applicant who employs about 20 people currently intends to increase this to about 35.
The increase in employees will make the applicant a major full time employer in the area.

The move from Ruswarp will decrease the traffic through the village increasing safety. It must be beneficial for this for the company to relocate to the industrial estate which is a more appropriate location.

Regards
Graham Collinson

We use this company and have been very happy with the service provided.
In the current difficult climate everything should be done to support local companies employing local people.
This company clearly provides a needed service in the local area.
