Hi Mark,

The client intends to mount solar pv panels on the roofs of the industrial buildings as required to meet the 10% of the cO2 emissions. The number of panels required will be determined by the future CO2 calculation.

Kind regards,

Jill Gaunt  
Minerals and Waste Consultant

Jill many thanks. On point 6 , I can condition the details, but I will need to know how your client intends to do this in principle e.g. solar thermal panels , solar pv panels or air source heat pump, to be satisfied it can be achieved to meet the policy.

I look forward to hearing from you.
