Good afternoon Helen

Thank you for your email. Please find attached a plan showing the area of planting / landscaping proposed for the planning application

Prior to your email and request for landscaping to reduce the visual impact of the proposed building, we had been mindful of the site being visible and were planning to landscape similar to your suggestions.

Having looked at the area we are planning to create a new hedge which endorses your suggestion down the west side of the track, as well as across the southern end of the yard , continuing northwards to the rear track as shown on the attached plan .Trees will be incorporated within the hedge (examples given by yourself) Further advice being sought from your Conservation Dept. prior to planting.

It would be very much appreciated if, subject to your approval, if this plan / scheme could be incorporated with this application.

If I can be of further assistance before 13th.October please do not hesitate to contact me.
