Dear Jill,
Thankyou for your advice. I attach the forms below. I hope this format is acceptable. I tried to complete the form electronically through the Planning Portal, but I think I was blocked because the original application has now been closed.I am happy to post paper copies if required.
I will contact your admin. team to make the payment.
I took advice from Straws re the materials. I hope I have provided enough detail.
I note your comments about the door. If you get any feedback from your conservation team please let me know.

6,DISCHARGE OF CONDITION

Renovation of outside seating area.

Replacement of upturned paving slabs[see photo] with coursed herringbone sandstone from Eskadale stone at Aisalby, built with hot mix lime mortar.

The floor area will remain at its original height but will be re-laid with sandstone, to include the area marked in black on the photograph. The height of the wall will be approximately 60cm, length 260cm. We intend to preserve the privet hedge at the back of the wall.
