

Robin Hoods Bay Tourism Association Limited

The interactive touch screen has successfully operated and has been located outside the station Road Stores for the past 5 years. We originally gained planning approval on the 15th March 2016 for a period of 5 years (Application number NYM/2016/0001/AD) There have been no incidents or complaints, relating to the running and location of the Touch Screen during this period.

The screen is angle away from oncoming traffic and the request by highways was met, at the time of the original planning installation.

We are now obliged to renew this planning application, but request that the approval period could be, either open ended, or for a 10-15 year period, should this be within the remit of the planning officer. We are a none profit making and voluntary organisation, with limited funds and would respectfully request you view this request favourably.
