Dear Jill

The site falls within a SSSI impact zone for combustion. Please can the applicant confirm whether the output from the biomass boiler will be less than 50MW? If above 50MW, we may need to require a SCAIL (combustion) assessment is carried out and submitted to enable us to assess potential impacts on surrounding designated sites.

Please can an external lighting condition be attached to any approval to ensure dark skies considerations are full taken into account.

Many thanks

Elsbeth
