

Dear Mr Hill

Ref:NYM/2021/0924/FL

I am writing in regards to the parish council response as to why we require condition 2 to be temporary relaxed for twelve months.

The reason we require the summerhouse to be temporary used as a dwelling is that the main house will become uninhabitable. We have tried to do as much work as possible regarding the extensions which has been uncomfortable to say the least at times. But when the main work starts there will be no security to the house, the hole ground floor is to be removed ready for insulation, underfloor heating then concrete screed, all plumbing is to be removed so no water as the lead pipes need to be replaced and no access to the first floor as the staircase has to be removed due to the ground floor works, staircase supporting wall removal and hall extension, at this time a large amount of flooring and joists will also be removed on the first floor making it unusable. It is due to these reasons we require condition 2 to be temporary lifted.

Kind regards

Mark Wilson & family
