Dear Jill

Chris and I were just checking on the Public Consultation Responses in relation to our application NYM/2021/0866/FL. We see that Elspeth Ingleby has asked for confirmation that the output will be less than 50MW. I can confirm that the boiler output will be very significantly less than 50MW.

We will have no issue with an external lighting condition being applied in relation to the new building. We are happy to follow the NYMNP guidance here <https://www.northyorkmoors.org.uk/discover/dark-skies/dark-skies-friendly-lighting> and the IDA guidance here <https://www.darksky.org/our-work/lighting/lighting-for-citizens/lighting-basics/>

If there is any particular wording you prefer for the lighting condition please could you let us have this?

Please do not hesitate to contact Chris or me if you have any other queries.

Kind regards

Lorna

Lorna Harrison
