Subject: RE: Brow Hill Cottage - NYM/2021/0824/LB

Dear Lucy

Thank you for your continued help with this application. Following our discussions, please see attached revised drawings in line with the suggestions from the Conservation team.

Drawing D21213 – 2 shows the vertical section through for the front windows with 33 mm structural glazing bars as suggested

Drawing D21213 – 3 shows the vertical section through for the rear and side windows with 33 mm structural glazing bars as suggested

Drawing D21213 – 4 shows the horizontal section through for the rear large kitchen and side sitting room windows with 33 mm structural glazing bars and dummy meeting rail as suggested

Drawing D21213 – 6 shows the revised elevation drawing, with the dormer windows as one – pane sashes as suggested.

I trust this now satisfies the team and you can recommend approval.

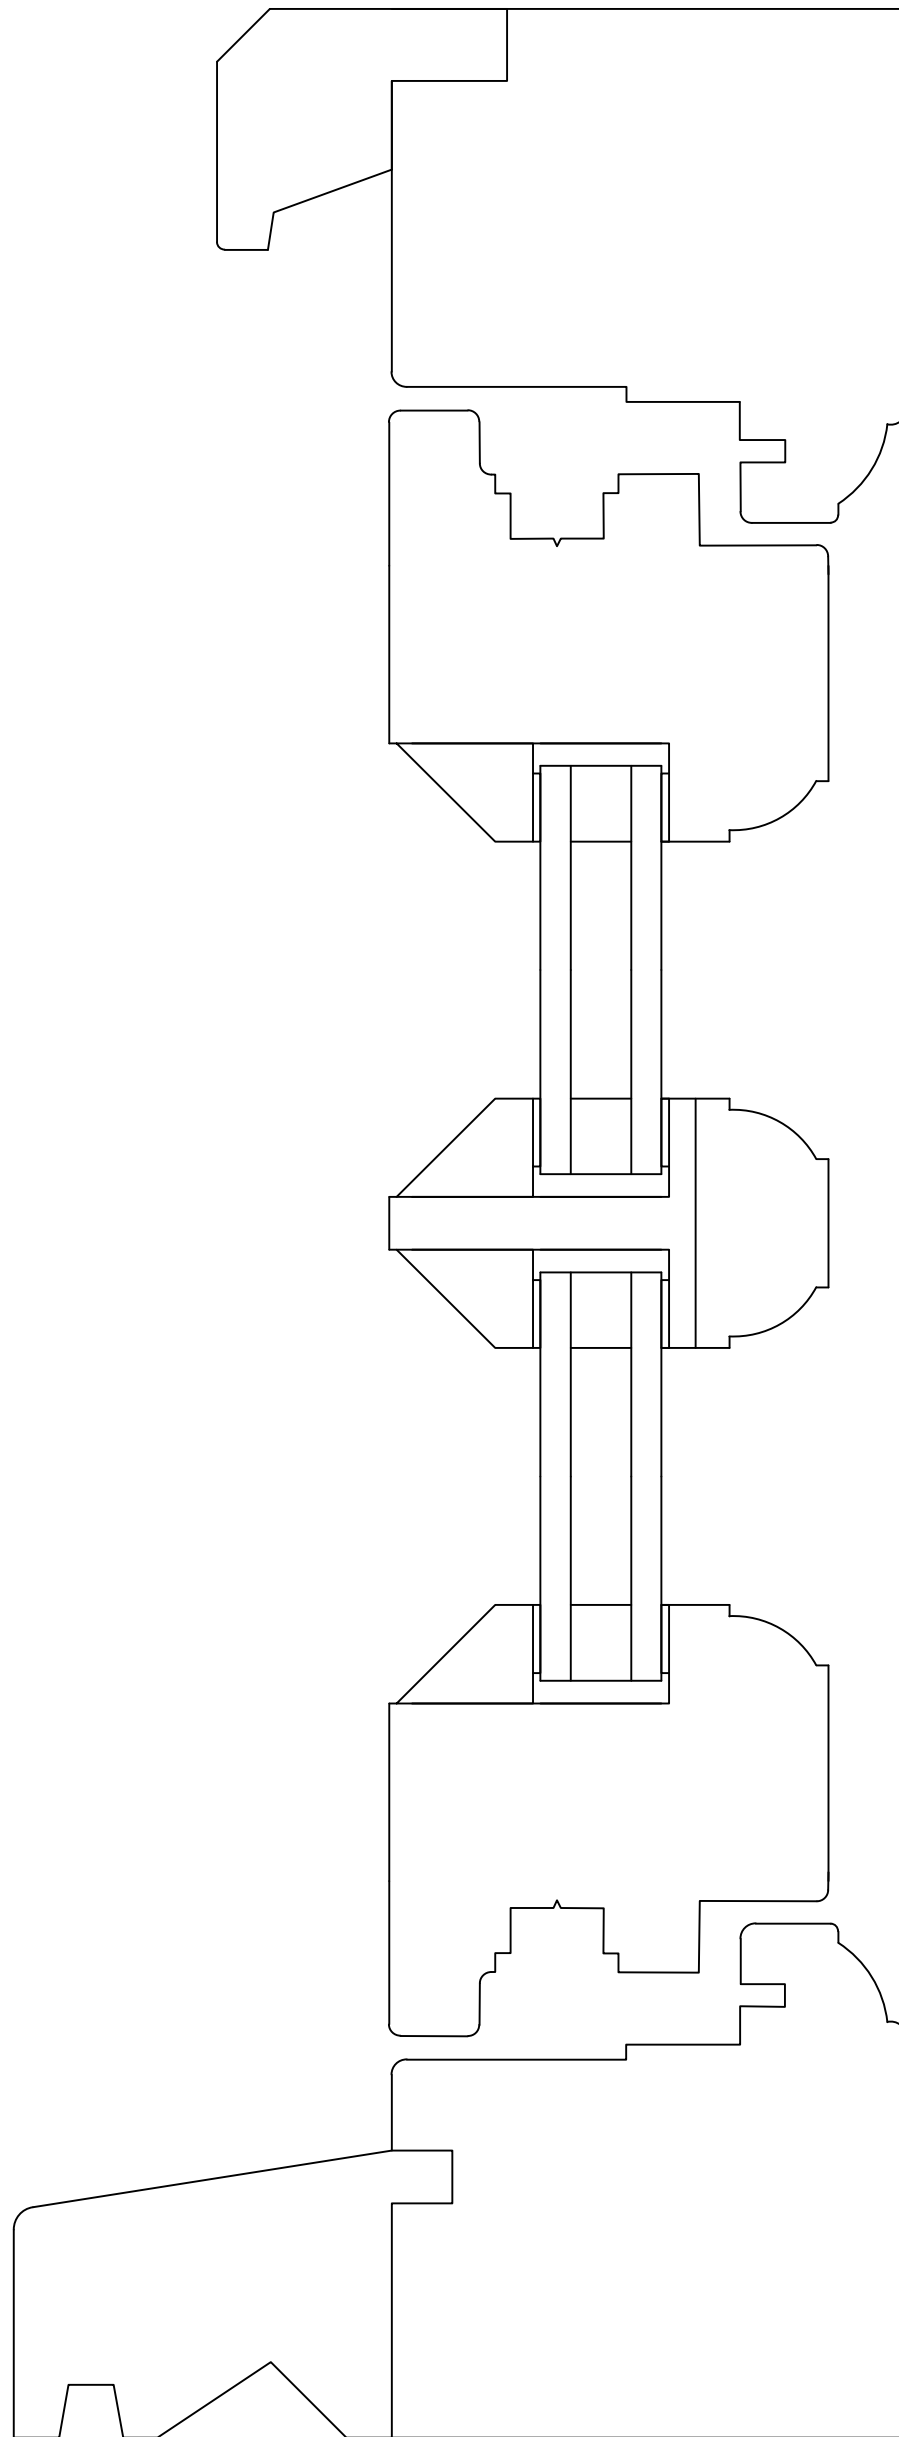

Please do not hesitate to contact me if you have any queries.

Regards

Lawrence Wall
