Dear Megan,

Following our telephone conversation earlier today, I can confirm that in respect of the options for the installation of the extraction vent, the applicants are happy for Option 4c), as set out in paragraph 5.3 of the Design and Access Statement to be conditioned on the decision notice e.g. Extraction unit to be run through a new opening on the eastern elevation close to the north-eastern corner, through the existing wall and into the existing understairs cupboard and out through existing void .

If you need anything further please let me know.

Best Wishes

Andrea
