

Form B

DETAILS OF APPLICANT

<u>Name</u>	Taybia Arshad
<u>Address</u>	Northern Powergrid, Alix House, Falcon Court, Stockton-on-Tees, TS18 3TU.
<u>Tel.</u>	
<u>Email</u>	

Notes: This Form is for use in connection with an application for the Secretary of State for Business, Energy and Industrial Strategy consent under **section 37** of the Electricity Act 1989 to install and keep installed above ground an electric line of a nominal voltage of:

- less than 132 kilovolts; or
- equal to or greater than 132 kilovolts and less than two kilometres in length.

The Form should be sent to each local planning authority* in whose area the proposed development would be situated.

Developer's reference:

TA/ENQ23027510

Date: 24/02/2022

Local Planning/County Authority:

North York Moors National Park

Electricity Act 1989

Application is being made to the Secretary of State for Business, Energy and Industrial Strategy for consent to the development described overleaf. The Secretary of State will at the same time be requested to direct that planning permission for this development shall be deemed to be granted. The consent and the direction may be given subject to conditions.

To assist the Secretary of State in determining the application, the local planning authority¹ is requested to sign and complete the Certificate section and Part II, and to return all three sections of this form to the applicant. Department for Business, Energy and Industrial Strategy [Guidance Note 14D/226](#) describes this procedure and the reason for it.

Yours Faithfully

For and on behalf of the applicant

Signed:

PART ONE: CERTIFICATE

(To be completed by or on behalf of the local planning authority*)

The local planning authority*:

Choose an item. to the development described overleaf;

Choose an item. that a public inquiry be held pursuant to paragraph 2 of Schedule 8 to the Electricity Act 1989 before the Secretary of State reaches his decision on the application.

Designation: _____

On behalf of the: _____

¹ Please note: if the development falls partially within a National Park, a Form B must be completed by each relevant planning authority for that area. If the proposal concerns a line of 132kV or more, the Part One Certificate of the Form B must also be completed by the county council authority.

* *ibid*

PART TWO: PARTICULARS OF PROPOSED DEVELOPMENT AND REPRESENTATIONS

(To be completed, dated and signed by the applicant before submitting to the relevant planning authority)

Please note: *If the application is for a development as referred to under [Schedule 2 of the Electricity Works \(Environmental Impact Assessment\) \(England and Wales\) Regulations 2017](#) (the 2017 Regulations), and an environmental impact assessment has not been supplied by the applicant, the Secretary of State is required to make a Screening Decision before the application can be decided. To this effect the applicant is encouraged to submit to the Local Planning Authority the additional information referred to under [Regulation 12](#) of the 2017 Regulations and seek their views as to whether or not an environmental impact assessment should be undertaken in respect of the development. The Local Planning Authority's views can be submitted using **Appendix A²** of this Form.*

Application is being made

- a) for consent under section 37 of the Electricity Act 1989 to install or keep installed an electric line above ground;
- b) for a direction under section 90(2) of the Town and Country Planning Act 1990 that planning permission for the proposed development be deemed to be granted.

1. Description of the proposed development.³

PROPOSED NEW 3 PHASE OVERHEAD LINE – BEACON FARM, SNEATON, YO22 5HS.

This proposal will involve building a new section of 11kV overhead line for 3 phase working consisting of 3 x 50mm AAC phase conductor supported on wooden poles –together with the recovery of a section of 11kV overhead line.

The route of the new overhead line is shown in red on the attached plan numbered ENQ23027510.

The new section of underground cable is shown in green.

The section of overhead line to be recovered is shown in blue.

The total route length is approximately 180 metres.

2. Details of any representations or objections which have been received by the applicant prior to the submission of this form.

No objections have been made to the proposal.

² Annex A allows the local planning authority to give its views under regulation 13(3) of the 2017 Regulations. The timescales set out under regulation 13 would not be triggered at the time when the Form B is submitted by the Applicant to the local planning authority. The relevant planning authority is still obliged to make its representations to the Secretary of State on the application proposal within a statutory two month period or obtain an extension to the time limit from the Secretary of State and agreed with the applicant - Regulation 8 of the Electricity (Applications for Consent) Regulations 1990.

³ These particulars should be accompanied by such plans as may be necessary to enable the local planning authority to identify the land affected by the proposals and to appreciate the nature and extent of the proposed development, and by a copy of the environmental statement if the applicant has prepared one.

3. Details of the Applicant's compliance with their duty as specified under [paragraph 1 of Schedule 9 to the Electricity Act 1989](#).⁴

The route of the new overhead line is not considered to have any additional effect on the visual amenity in the area given that the length of the new overhead is less than the recovery of the existing overhead line.
The section of the new line will also include a section of underground cable to reduce visual impact.
A magic search has been carried out and no Archaeological interests have been found.
Any request to carry out a Watching brief during our works will be agreed.
Tree lopping may need to be carried out near the overhead lines in order to maintain the necessary safety clearances.

For and on behalf of the applicant

⁴ Please provide a brief description of the measures adopted and reference the documents included in the application that give complete information.

PART THREE: CONSULTATIONS AND OBSERVATIONS

(To be completed by the local planning authority)

Planning Reference No.

1. List the names of interested parties consulted and provide particulars of any comments received⁵.

2. Details of any objections or representations which have been made to the local planning authority.

3. Are there any restrictions on the land that require the Applicant to obtain approval from other organisations⁶?

Yes No

If yes, please provide details:

4. Is the local planning authority's agreement to the proposal subject to modifications or conditions to the consent? (If so, specify the modifications or conditions proposed and state whether they are acceptable to the applicant).

Choose an item.

5. Does the local planning authority consider that the application should be accompanied by an Environmental Impact Assessment in accordance with the [2017 Regulations](#)? (Please note: if the development falls under [Schedule 2](#) of the Regulation the Secretary of State will require the local planning authority's views in order to make a Screening Decision⁷. Views can be submitted using **Appendix A** of this Form).

Choose an item.

Date 24/02/2022

Signed:

⁵ Provide details of all consultees and responses. If the proposal falls within a [SSSI Risk Zone](#) the local planning authority should consult with the relevant statutory conservation body to seek guidance on any necessary mitigation. The Department will require confirmation that the consultation has been carried out and receive copy of responses.

⁶ i.e. consent under Section 38 of the Commons Act 2006.

⁷ [Regulation 13](#) of the 2017 Regulations sets out the legal requirement for this consultation.

Appendix A

Local Planning Authority's Views under [Regulation 13 of the 2017 Regulations](#)

(to be completed by the local planning authority)

Does the proposed development fall under [Schedule 2](#) of the 2017 Regulations?

- a) the proposal is for an electric line installed above ground with a voltage of 132 kilovolts or more
- b) the proposal is for an electric line installed above ground in a sensitive area
- c) the proposal is not a Schedule 2 development, but views have been requested by the BEIS Secretary of State

Please consider if the Applicant has submitted sufficient information.

Where relevant, the information to be provided by the Applicant should include:	
1. a description of the development	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
2. a description of the physical characteristics of the whole development and, where relevant, of demolition works	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
3. a description of the location of the development, with particular regard to the environmental sensitivity of geographical areas likely to be affected	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
4. a description of the aspects of the environment likely to be significantly affected by the development	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
5. a description of any likely significant effects, to the extent of the information available on such effects, of the development resulting from:	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
a. the expected residues and emissions and the production of waste, where relevant;	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>
b. the use of natural resources, in particular soil, land, water and biodiversity	Yes <input type="checkbox"/> No <input type="checkbox"/> n/a <input type="checkbox"/>

Please note that the developer must take into account the criteria set out in [Schedule 3](#), where relevant, when compiling the information referred above.

Please provide comments to all sections of the table below where relevant to the proposal.

Characteristics of development	
Must be considered having regard, in particular to -	
(a)	the size and design of the whole development
(b)	cumulation with other existing and approved developments;
(c)	the use of natural resources, in particular land, soil, water and biodiversity;
(d)	the production of waste;
(e)	pollution and nuisances;
(f)	the risk of major accidents and disasters that are relevant to the development, including those caused by climate change, in accordance with scientific knowledge;
(g)	the risks to human health (for example, due to water contamination or air pollution).

Location of development		
The environmental sensitivity of geographical areas likely to be affected by development must be considered, having regard, in particular to -		
(a)	the existing and approved land use;	
(b)	the relative abundance, availability, quality and regenerative capacity of natural resources (including soil, land, water and biodiversity) in the area and its underground;	
(c)	the absorption capacity of the natural environment, paying particular attention to the following areas—	
	(i) wetlands, riparian areas and river mouths;	
	(ii) coastal zones and the marine environment;	
	(iii) mountain and forest areas;	
	(iv) nature reserves and parks;	
	(v) areas classified or protected under domestic legislation or legislation of EEA states;	
	(vi) European sites (as defined in regulation 8(1) of the Conservation of Habitats and Species Regulations 2017);	
	(vii) areas in which there has already been a failure to meet environmental quality standards that are set out in European Union legislation and are relevant to the development, or in which it is thought that there is such a failure;	
	(viii) densely-populated areas;	
	(ix) landscapes and sites of historical, cultural or archaeological significance.	
Type and characteristics of potential impact		
The likely significant effects of the development on the environment		
(a)	the magnitude and spatial extent of the impact (for example, geographical area and size of the population likely to be affected);	
(b)	the nature of the impact;	
(c)	the transboundary nature of the impact;	
(d)	the intensity and complexity of the impact;	
(e)	the probability of the impact;	
(f)	the expected onset, duration, frequency and reversibility of the impact;	
(g)	the cumulation of the impact with the impact of other existing and approved developments;	
(h)	the possibility of effectively reducing the impact.
