Subject: Fwd: Extremely urgent ! Aluminium Doors

Planning

Good morning Megan,

I hope you are well.

The doors for this development are certainly causing some problems but I hope you are happy with what we are proposing to enable us to continue with the aluminium.

We are unable to obtain a door to match the style of D2. The main reason for this is because the opening is only 1800mm high and the doors are 1985mm so are asking can we go for a fully glazed door the same as W8? This side of the building is the least visible.

We have no problems in obtaining D7. This would be a door called the Purton. From a company called smart. It is from the cottage range. It also comes in an unglazed Version. This is what we were wanting to use on D2 but the height wouldn't allow us.

Please see below the detailed drawings of doors as requested.

PURTON
DT0011

This door the Elberry is what we would use for D8

Granted it doesn't have the vertical panels in the bottom but as you can see from the other existing doors in the yard that we currently have they have less panels and more in keeping with the current buildings. Lead strips would be included in the window to give the same effect as the other 2 windows W1 & W2.

Alternatively we are happy to go with full glazed for this opening or the Purton.

The illustrations are an approximate representation of the finished product E&OE. Small alterations may be made to the specification for practical production purposes where necessary.

The colours depicted are for guidance only as the displayed colour will depend on your screen/device. Pearl or metallic sheen/sparkle cannot be recreated here. The finished colour may not be as shown here although every effort has been made to display colours accurately. Please refer to a physical Smart swatch for a more accurate depiction.

Your urgency on this would be greatly appreciated as the build is massively behind which I appreciate isn't your fault but I have also secured a pending manufacturing slot from the company who will be supplying the windows and hopefully the door upon your approval.

Should you need anymore details Mike Hewison from the supplier Eurocell will be happy to provide and discuss more details.

Many thanks

Craig Horrocks
