Jumping Pillows

PRODUCT SAFETY

Our design and production facilities are independently certified by TÜV SÜD and fully meet and exceed the requirements of EN 14960 Part 2 and EN 71/3. No other UK product achieves this level of performance.

Our UK based installation crews are fully trained and highly experienced in the specific safety requirements of the Jumping Pillow system. All operatives are certified for the equipment they may be operating and are full covered by UK insurances.

5 YEAR WARRANTY

Genuine Jumping Pillows last a lot longer than 5 years thanks to our unique UV Stabilized canvas, which is exclusively produced for Jumping Pillows.

You can be sure your Jumping Pillow will outlast your expectations. Jumping Pillows normally last for 8 – 12 years and thanks to our unique anchorage system, only the canvas needs to be replaced, thereby lowering the cost of refreshing your Jumping Pillow when the time comes.

Jumping Pillows

HOW WE CAN HELP

All Jumping Pillows are made to order, and we are more than happy to provide larger Jumping Pillows to clients who want to make use of the space available.

Jumping Pillows are available in any single or a mixture of the following colours.

Prices are available on request and are based on the location for installation(s), the timing for installation and the number of Jumping Pillows to be installed.

We are able to offer discounts for multiple installations to reflect our savings in mobilisation and shipping costs.

ABOUT JUMPING PILLOWS

The Jumping Pillow was invented in 1982 and is available globally to a wide range of facilities and venues. Each country has a single certified supplier, and, in the UK, this is Jumping Pillows based in the West Midlands.

We are based in the UK, have UK insurances and warranties and are proud supporters of UK jobs.

Please Note: The material used in the production of Genuine Jumping Pillows® is unique to Jumping Pillows® and is not available to any other European manufacture of similar products. Our material resists UV degradation by up to 3 times longer than standard (Curtain Sider) material thus extending the performance life of our Genuine Jumping Pillow®
