Hi Wendy,

Here's a more specific plan for construction from the contractors that will be doing the work.

Rebecca

WORKS. Using 5 Ton Digger, JCB loadhall Tractor & trailer Vibrating roller
To Digout and create 2 stone tracks 1mtr apart and 1mtr x 100mtrs x 300mm deep using 75mm clean stone @ 200mm deep on Terrain membrane covered with a 100mm deep wearing layer of 45mm down to dust Dark limestone
Stone to be compacted with vibrating roller
Farmer to lead soil away

Hello Kelsey,

Thanks for your email – the track is being paid at the Countryside Stewardship (RP4) rate, so we're insisting that the CS requirements are adhered to:

Stone or hardcore to a depth of at least 150mm and compact it; finish the top of the track with a finer material (of 18mm to dust) to a depth of 25 to 50mm and compact it into a convex camber.

I've attached a simple map of the line and length of the proposed new track, marked in red.

If there's anything else I can help with, please just ask.

Kind regards,
Carl

Hi Carl

Thank you for providing the requested images and map. I would be grateful if you could also confirm the proposed surfacing material for the track.

The map is useful for identifying the existing PROWs in this area, however it is unclear exactly which pink line relates to this enquiry. Therefore I would be grateful if the proposed track could be identified by a red line to show its exact location and length.

Many thanks,

K. Blain

Hi Carl,

Please can you save this email and photos to the New House Farm FiPL folder? Please can you also send photos to Planning and send them the PROW map you produced showing the line of the footpath as being the line for the track (for pre-app advice)?

Thanks

Rebecca

The map you sent me of the footpath highlighted in pink is correct.
