Dear Mr Deighton

Work to trees protected by TPO 1963/27 Egton Bridge

I refer to your application dated 8 June 2022 to carry out work to trees protected by the above Tree Preservation Order.

I can now confirm that the North York Moors National Park Authority consents to the following work:

W1	Crown lift as required by up to a maximum of 6 metres of all edge trees along the southern boundary of TPO area W1 where it adjoins Station House. Remove large limb on the single oak along the same boundary.
Reason for consent – The work is reasonably required to prevent the lower parts of tree crowns becoming a nuisance, and reduce in some cases the possibility of branch fractures.	

This permission is subject to the following conditions:

- That all tree works shall be carried out in accordance with British Standard 3998:2010, Tree Work- Recommendations;
- That work shall be carried out within a period of two years from the date of this letter (or else a new and separate application will be necessary).

Note: Road and Street Works Act 1991. If part of the above works present a risk to the public, advice on sign requirements and/or traffic control should be sought from the North Yorkshire County Council Highways and Transportation Department.

Note: Wildlife and Countryside Act 1981. Under Sections 1 and 9 it may be an offence to damage or destroy a bird nest in use or being built, or to deliberately disturb a bat roost. Legal protection to certain species (such as bats) has also been increased under changes made in 2007 to the Habitats Regulations.

Note: The North York Moors National Park Authority does not accept liability for any damage resulting from the work authorised. It is strongly recommended that a competent tree surgeon, using appropriate safety equipment, and with appropriate public liability insurance, is employed.
