Emily

I've been able to have a brief discussion about these two schemes with Mike Hawtin, who has had more detailed involvement with the site and the background to this replacement lighting proposal. Whilst the replacement of existing lighting units at both the Visitor Centre and in the Courtyard area with 'dark skies' compatible units is welcome, it is not completely clear from the information provided that the proposed replacements are on a like for like basis (ie that no new lighting units are proposed above the number already present). Whilst it is understood that this is the intention behind the proposals, it would be useful if the applicant could be asked to clarify this formally for the purposes of both applications. Obviously this is a very important location from a dark skies perspective and it will be helpful if the proposals are sufficiently clear on exactly what is proposed and where.

Mike may be able to provide further advice on this scheme if required.

Kind regards

Rob
