Subject: Re: NYM/2024/0006 Hodgson Moor Farm, Gowland Lane, Cloughton - Additional Information Required

Afternoon,

I am supplying some more information and photos which I hope helps to answer your queries.

Condition 7 - A rich hedgerow will be planted consisting of bundles bought which will include hawthorn, dog rose, blackthorn and field maple.

These will be planted approx. 3 - 6 to a metre in a single row to the north and west boundaries.

They will be planted anytime now unto the end of March. All weeds will be removed and a trench dug with rotted manure in the bottom. The hedgerow will grow to no more than 3 metres high.

Condition 8 - To the west of the shed is a 6 inch full length guttering with a down pipe going into a soak away. This goes into the perforated black piping which goes into the existing land drain.

2 pictures attached.

Thanks, Janet

for D W & N W FENBY
