Subject: Quarterdeck Robin hoods bay

Hi Hilary Re planning application nym/2018/0177/fl Can i please ask you to check what i believe to be several mistakes on the application plans. On the application it states there is to be only a 1 metre high gabion basket retaining wall if you read further down it reads this will be made up using two 60cm gabion baskets so that's 1.2 metres and when you look at the plans on the side plan it shows what looks like 3 baskets that would be a retaining wall 1.8 metres high? Also on the front view the wall does not look anything like a metre high. The applicant is clearing the lovely coastal vegetation and putting up bits of wood as i send this at 8.50pm tonight. Friday you and the planning committee will not actually see what a lovely area it normally is, but as the wall will be about 6 metres back from the edge of the quarterdeck can i suggest that the actual height of what the wall will actually be is checked and if the plans are wrong it be noted. Regards Neil Purves
