Re Application number NYM/2018/0364/TN

As a resident of Staithes, and chairman of Staithes Communities Ltd, I am disappointed that this site was even considered by SBC, one could cynically surmise that potential rental payments have influenced their decision. NYMNPA have done a great job of transforming the old grass bank in front of the car park into a beautiful naturally themed planted area and a 12 meter pole would ruin this aspect, totally dominate the corner and be the first thing visitors notice on arrival.

I know nothing about siting and area coverage of radio antenna but couldn't sites be sought that are less obtrusive, for instance on the same field as the present water works by the Whitby road on the outskirts of Staithes, or say in one of the lay byes on the Boulby bank road towards Easington, or even strapped onto the Boulby Mines chimney, any where in fact but in what is virtually Staithes Village centre.

Kenneth Smith.

PS, if possible I would appreciate being kept informed about any public meetings regarding this issue.
