It doesn't seem a high likelihood of roosting bats, so don't think a survey is required. Bat informative should definitely be included in notice if required.

Hi Rachel

We couldn't ask for one prior to registration of the notification however if you guys feel that the building has the potential for bats I would suggest requesting a Survey as part of your response. Ecological impact is one area we can consider as part of the notification process.

Wendy

Wendy – do they not need to do a bat scoping report because it involves demolition?
