Hi Hilary,

Our client has responded straight away.

The details are below in his email.

They set out the situation quite well and give numbers which help if you need to reference activity.

Kind regards

Neil

Hi Neil

Over the last 18 months we have downsized our fleet from 22 to 16 vehicles, meaning we now have surplus room in our yard.

We also provide parking facilities (4 bays) for an outside company, if the development went ahead we would terminate the agreement with the outside company to provide more parking bays for our own vehicles.

If the development went ahead we still have sufficient room to operate adequately

Kind regards

Chris

Morning Chris,

The National Park are looking at the scheme.

Please see below a query from the Highways dept (Highlighted). They ask where coaches currently using the area to be developed will be re sited?

Let me now your thoughts when you can.

Kind regards

Neil

Morning Neil,

I have received the following query from the Highway Authority:-

“The proposed units are in an area where Coastal & Country Coaches park their coaches. If this area is not available, where are the coaches going to go instead? The area for Coastal and country Coaches should still be sufficient to provide parking for the coaches, the staff vehicles and turning areas. If there is still going to be sufficient space, can details be provided by the applicant showing these revised areas.”

I would be grateful for the additional information at your earliest convenience.

Kind regards

Hilary
