Hi Harriet

Apologies for the delay in replying to you.

Yes, I'm happy with the existing and proposed infrastructure at this location to control the speed of cyclists on this section of the new cycle trail in Dalby.

Many thanks  
Regards  
David

Dear Ms Frank,

**Re: NYM/2018/0708/FL New section of cycle trail Dalby Forest**

The British Horse Society is concerned about the crossing of the public bridleway by the trail. We object unless sufficient notices and physical construction are put in place to lower the speed of cyclists approaching and crossing the bridleway. It should be compulsory that cyclists stop and look both ways before crossing the bridleway.

We are also concerned at the lack of educational material over the whole site re the fact that in law cyclists must give way to walkers and riders of horses on all bridleways. With education and toleration all users can enjoy the facilities but cyclists must not be encouraged to think that these trails are for their sole enjoyment.

Yours sincerely,

Catriona Cook MBE (Mrs)

Where the proposed new section of trail crosses the public bridleway 030 at grid ref SE8765 8656, I'd like to see the trail designed and constructed in such a way that the approach speed of cyclists is reduced and controlled to eliminate any danger to users of the bridleway.  
During the construction phase, the bridleway must remain unobstructed and safe to use at all times. The section affected will need to be appropriately signed with a site safety plan in place.

Good morning

Our next Council meeting is on the 4<sup>th</sup> December therefore the Council ask if you will extend the period so they may make observations on tis application.

I would email you the Councils remarks on the 5<sup>th</sup> December as per usual.

Regards

Michael

Thank you for the opportunity to comment on this proposal on behalf of the Ramblers' Association.

We are concerned to note that the existing trail takes cyclists along a bridleway to which walkers and horse riders have right of access. The encouragement of cyclists to move along this path at speed represents a clear danger to other users, and so we are pleased that it is proposed to re-route the trail away from the PROW. Information is needed about the steps being proposed to safeguard walkers and riders at SE 8765 8656, where it is proposed that the trail will cross the bridleway.

Access to the site is likely to interfere with the existing PROW, but no steps have been specified to safeguard users of the PROW while work is in progress. We therefore **object to the proposal** on the grounds that there are no plans for safeguarding the safety of walkers while the work is in progress.

**Colin Monson**  
Footpath Secretary, Ramblers' Association
