HERITAGE STATEMENT

Outbuildings at rear of Lowdale Hall Sleights ,Whitby

The buildings concerned form part of a range outbuildings to the rear of Lowdale Hall which is a late 18th century house. The buildings were probably used as stables and are of traditional construction with stone walls and typically having only a few external openings including particularly vertically boarded doors.

The proposal is to create 2 dwelling units by mainly internal alterations retaining the existing timber trusses which support the purlin and rafter roof construction and retaining the existing building envelope with a minimal no. of external openings in order to retain the existing character of the buildings.

The existing building will not be extended and the character of the building will be maintained with any repairs being carried out in materials to match the existing.
