

PICTURE 2

SMALL WINDOW

FRONTAGE

Picture 2: submitted with the original planning application. Showing the small window, (surrounded by clematis), that we wish to relocate in the exact same position in the newly built frontage wall

PICTURE A

The amendment sought is indicated in red; showing the existing small south facing window position and its' relocation, to the exact same line on the replacement south facing wall, **Aligning it with the kitchen window frontage**

PICTURE B

The image shows the front elevation of a stone building during a renovation project. A small, dark-framed window with a grid pattern is set into a wall of rough-hewn, light-colored stone blocks. To the right, a section of the wall is missing, revealing a rougher, more irregular stone structure. In the foreground, a new wall is being constructed from large, rectangular, grey-blue concrete blocks. A white spirit level is placed on top of these blocks, with red circular markers on its ends. A vertical metal level is also visible on the left side of the existing stone wall. The background shows a body of water and a pine tree under a clear sky.

**Front Elevation
showing location of the small window
which we would relocate onto
the exact same line
on the replacement wall**
