There are existing lakes on the site which are currently used as a fishery for the Throxenby Mere Angling Club with an access from Waites Lane, Harwood Dale. The access is existing and constructed and there is car-parking within the site. The proposal is for the creation of an additional fishing lake area within the existing site using the existing facilities provided. The impact on the highway from the provision of additional fishing lake at an existing Angling Club would not be significant and therefore, there are **no local highway authority objections** to the proposed development.
