Subject: South Moor Farm, Langdale End, Scarborough.

I would like to object against the proposed application to site two grass runways on the site of South Moor Farm, Langdale End, Scarborough.

As a local resident my objections are as follows - My home is situated in the path of the proposed take off and landings, and the tranquillity of my home and surroundings will be adversely affected, I believe that know one has taken into account the amount of time the aircraft spend circulating in the area, it can go on for hours, round and round and the noise is far greater than that of a motorcycle or any farm machinery that I have ever heard. Because a lot of the homes near South moor farm are located in the valley high on the hill side, the air craft when in flight are in line with the dwellings, to say any increase in air craft will not affect us detrimentally is I believe short sighted.

I live in this area because it is tranquil and because of the beauty and nature of this environment, I see and hear wild birds all around me, only yesterday did I observe a bird of prey behind my home, we cannot surly allow the enjoyment of a few to spoil the environment and future habitat of the wildlife that exists here.

I would like to point out the Sandford Principle in relation to the rare and endangered birds that have been observed in this area, and I ask that you protect this area of outstanding beauty not only for myself and my neighbours but also for the incredible wild life and for the future.

Name - E Martensson

Address - 1 Darncome Bungalows, Langdale End, Scarborough
