Regarding NYM/2016/0817/FL.

Dear Ms Saunders,

I write again regarding the request to build an airstrip and buildings at Southmoore Farm.

All the points of previous letters are still very much a concern. The immediate area is one of the few peaceful places left in our ever increasing crowded and noisy world and one where wild life has a haven at least for most of the time.

How can this unnecessary development for the profit of one man be sanctioned where all the surrounding villagers will be

affected and be so inconvenienced by noise pollution and indeed danger,

There is a bridleway next to the proposed runway. Horse riders are constantly having to ^{brave} roads and unsafe routes to the few safe places to ride. On the BHS website are statistics of the fatalities on our roads to see the very real problem. Officers work tirelessly to keep bridleways open, and safe. Safety will no longer apply at Bickley and for miles around.

I urge you to listen to the people who will be affected.

What common good will this proposal do in our area of peace and tranquility.

One man's benefit can not override the wishes of the people who have to bear the consequences.

Yours sincerely
