Mark

I have looked at the reports prepared to address the following conditions for Phase 2 of the development:  
4: Ground clearance (including vegetation)  
52: Protected Species Management Plans for Birds, Bats, Reptiles  
64: Boundaries  
76: Soil management

I am content that they have been satisfactorily discharged from an ecological viewpoint, although for bats (Condition 52), I would recommend that some or all of the proposed bat boxes are put in place as soon as possible.

Environment Agency staff will be much better able to assess the reports addressing Conditions 60 and 79 than I am. I note that they are considered to be only partially discharged and that more information is needed. The quantity and quality of water leaving the site is critical for sensitive aquatic species downstream, so I trust that any remaining issues will be resolved to the EA's full satisfaction.

You have received this email from North York Moors National Park Authority (Planning Service) in relation to a planning matter at Dove's Nest Farm & Haxby Plantation, Sneatonthorpe(proposed minehead); underneath 252 sq km of the NYMNPA(winning & working of minerals); a corridor extending underground from the edge of the NP boundary to Wilton International Complex(mineral transport system); Lady Cross Plantation near Egton, Lockwood Beck Farm near Moorsholm, Tocketts Lythe, near Guisborough(intermediate shaft sites); site within the eastern limits of the Wilton International Complex, Teesside(tunnel portal).

The attached correspondence contains important information; please retain it for your records.
